### **Reasons For Allowance**

1. The following is an examiner's statement of reasons for allowance: Upon further examination of the art of record, it has been decided that the art considered as a whole, alone or in combination, neither anticipated nor renders obvious the claimed bag making method comprising a melt-bonding step wherein the temperature of a sealing mold is 10°C or more than the melting point of a bag unit resin, and the time period between a preliminary heating step and the melt-bonding step such that the sealing mold is pressed against a mouth member in the opening of the bag unit is 1 to 4 seconds, for the purpose of allowing the mouth portion to be softened for bonding to resin of the bag unit without significant deformation of the mouth portion and overstressing of the film creating holes in the film post sealing. The prior art, such as JP 2940987, disclose the temperature range as claimed by Applicant, but does not disclose the time frame claimed by Applicant, wherein the specified time range in combination with the specified temperature range ensures proper sealing strength of the bond between the mouth piece portion and the resin of the bag unit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
